

Technical Features

The Ezy Receiver allows the iSeeAll SmartPhone kit to operate nearly any brand of garage door opener. As a dual channel receiver, the Ezy receiver can be easily wired into 2 different garage door openers. The simple Learn / Delete function allows up to 200 remote controls to be programmed across the two channels.

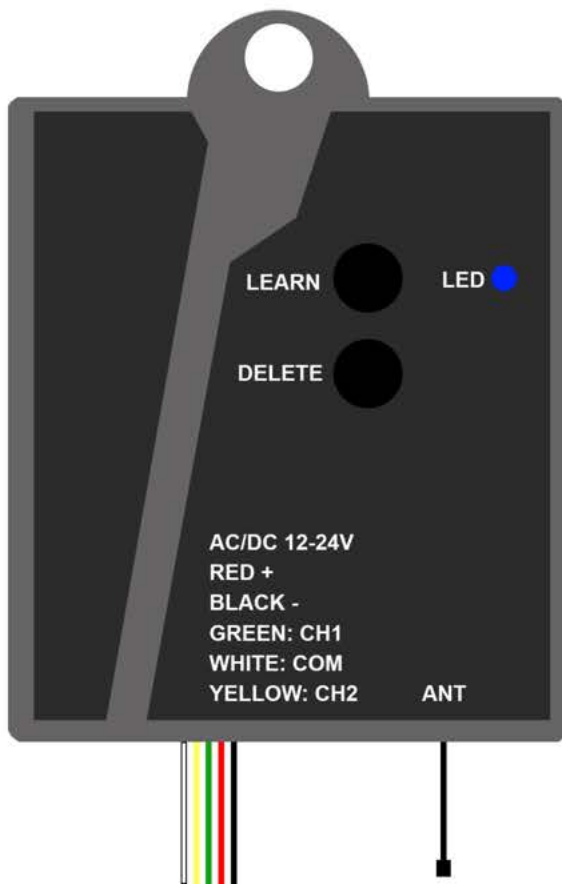

Remote Coding Method

- 1 Press and hold until the blue Learn LED illuminates, then let go.
- 2 Press and hold the desired button on your remote control.
- 3 The blue coding will initially flash once, then after a brief pause the receiver will repeatedly flash and click to signify that the remote control has been programmed.
- 4 Test the operation of your new remote control

Clearing All Remote Controls

- 1 Press and hold the Delete button for ten seconds, or until the blue LED illuminates
- 2 Release the Delete button. Test that your remote control no longer operates the receiver.

- Please note, this will clear every remote programmed into the receiver

Wiring Key for This Manual

White = Common

Yellow = Channel 2

Green = Channel 1

Red = Positive

Black = Negative

Ezy Receiver

Wiring Guide

ATA GDO-6

Terminal block located on the circuit board, bottom left.

ATA GDO-9v2 / v3

Terminal block located on the circuit board, top left.

ATA GDO-7

Terminal block located on the rear of the motor, bottom left corner.

ATA GDO-11

Terminal block located on the rear of the motor, bottom left corner.

Ezy Receiver

Wiring Guide

ATA DCB05 Gate Control Board

Circuit Board is located in the white box, attached by a cable to the SGO1 motor.

ATA NeoSlider 24v3

Circuit Board is located inside the motor housing.

ATA NeoSlider 500 / 800

Circuit Board is located inside the motor housing.

Wiring Guide

B&D CADPD (RDO-1v1)

Terminal block located on the circuit board, bottom left.

B&D CADPD (RDO1v4 - Current)

Terminal block located on the circuit board, top left.

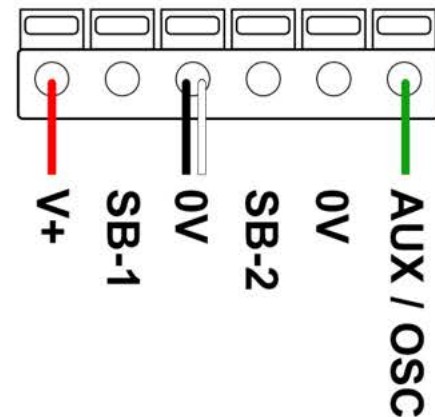

B&D CADS (SDO3v1)

Terminal block located on the rear of the motor, bottom left corner.

B&D CADS (SDO3v2 - Current)

Terminal block located on the rear of the motor, bottom left corner.

B&D CAD Advance (SDO2v2)

Terminal block located on the circuit board, left side.

B&D PanelPro (SDO4v1)

Terminal block located on the rear of the motor, bottom left corner.

Ezy Receiver

Wiring Guide

B&D Secure (SDO6)

Terminal block located on the rear of the motor, on the right hand side

B&D Smart (SDO7)

Terminal block located on the rear of the motor, on the right hand side

B&D Roll-A-Pro (RDO1v4)

Terminal block located on the circuit board, left hand side

Ezy Receiver

Wiring Guide

BOSS / Steel Line BOL4

Terminal blocks located on the rear of the unit, at the top.

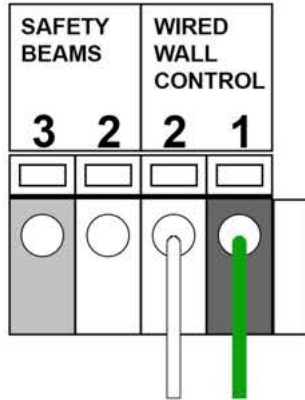

Ezy Receiver

Wiring Guide

Merlin MR650 / MR650EVO

Terminal block located on the circuit board, bottom left. Ext power supply required.

Merlin MR850 / MR850EVO

Terminal block located on the circuit board, bottom left.

Merlin MR655MYQ

Terminal block located under light cover on front of motor.

Merlin MR855MYQ

Terminal block located under cover located on bottom rear of motor. Cover can be removed.

Merlin MT60EVO, MT100EVO, MS65MYQ, MS105MYQ & MS125MYQ

Terminal block located under cover located on bottom rear of motor. Cover can be removed.
